Florida Pompano				3	Mercury
Black Sea Bass				4	Mercury
Dungeness Crab ✓				4	Mercury

Women: These advisories are for women ages 18–75, based on a body weight of 144 pounds (65.4 kilograms) and a meal size of 6 ounces (a little more than one-third pound) of fish before cooking. For advisories due to mercury, this advice is intended to protect women of childbearing age and errs on the side of safety for other adults.

Men: These advisories are for men ages 18–75, based on a body weight of 172 pounds (78.1 kilograms) and a meal size of 8 ounces (one-half pound) of fish before cooking.

Older children: These advisories are for children ages 6–12, based on a body weight of 67 pounds (30.5 kilograms) and a meal size of 4.5 ounces (a little more than one-quarter pound) of fish before cooking.

Younger children: These advisories are for children ages 0–6, based on a body weight of 32 pounds (14.5 kilograms) and a meal size of 3 ounces (a little less than one-quarter pound) of fish before cooking.

Fish not on this list are either safe to eat at least once per week, or have not been tested sufficiently for contaminants.
